Administration of Active IQ Unified Manager ONTAP

Category: Infrastructure & IT Operations | **Vendor:** NetApp

Duration: 16.00 hours (2 days) **13.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Through brief lectures, exercises, and classroom discussion you discover how to deploy and maintain NetApp® Active IQ® Unified Manager. You also learn how the performance-management features of Unified Manager provide a unified approach to storage management that reduces complexity. This course can be delivered in a traditional classroom or a virtual classroom.

About This Course

Through brief lectures, exercises, and classroom discussion you discover how to deploy and maintain NetApp® Active IQ® Unified Manager. You also learn how the performance-management features of Unified Manager provide a unified approach to storage management that reduces complexity. This course can be delivered in a traditional classroom or a virtual classroom.

Who Should Attend

- Customer systems administrator
- Partner professional services engineer

Prerequisites & Entry Requirements

General Prerequisites:

- ONTAP Cluster Administration (ONTAP9ADM)
- ONTAP Data Management Fundamentals

Learning Outcomes

Upon successful completion of this course, participants will be able to:

This course focuses on enabling you to do the following:

- Describe the NetApp data management solutions
- Define common data management terminology
- Install and maintain a Unified Manager deployment
- Use Unified Manager to monitor the health and performance of your storage infrastructure
- Categorize storage objects and implement annotation and group features
- Configure thresholds, event retention settings, and alerts so that storage issues can be anticipated and quickly identified
- Explore reporting tools and run reports

Detailed Course Outline

Module 1: Review Active IQ Unified Manager

- Discuss the NetApp Active IQ Unified Manager architecture

Module 2: Deploy Unified Manager

- Install Unified Manager
- Configure initial Unified Manager settings
- User management
- Discover what happens when you add a cluster as a data source

Module 3: Explore the Unified Manager UI

- UI features and use

- Customize the UI

Module 4: Customize Unified Manager for Your Storage Environment

- Customizing thresholds

- Events and alerts

- Annotation and Groups

Module 5: Monitoring Storage Objects

- Monitoring object health

- Monitoring object performance

- Monitoring data protection

- Rest APIs

Module 6: Reporting in Unified Manager

- Reporting overview

- Creating, scheduling, and generating reports

Module 8: Maintain Unified Manager

- Protecting the Unified Manager database

- Upgrading Unified Manager

- Troubleshooting Unified Manager: Active IQ

- Troubleshooting Unified Manager: Collecting a support bundle

- Troubleshooting Unified Manager: Log files

- Troubleshooting Unified Manager: MySQL

- Troubleshooting Unified Manager: Active Directory and LDAP

- Troubleshooting Unified Manager: Cluster not reachable

Skills You Will Learn:

This course focuses on enabling you to do the following:

- Describe the NetApp data management solutions
- Define common data management terminology
- Install and maintain a Unified Manager deployment
- Use Unified Manager to monitor the health and performance of your storage infrastructure
- Categorize storage objects and implement annotation and group features
- Configure thresholds, event retention settings, and alerts so that storage issues can be anticipated and quickly identified
- Explore reporting tools and run reports
