Autodesk Revit 2025: Fundamentals for Structure

Category: Design & Creative | **Vendor:** Autodesk

Duration: 4.00 hours (1 days) **3.3 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: vILT

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information

Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information

Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information

Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views., Describe the concept of Building Information Modeling in conjunction with applying Revit.Navigate the graphic user interface, including the ribbon (where most of the tools are found), Properties (where you make modifications to element information), and the Project Browser (where you can open various views of the model).Open existing projects and save projects.Use viewing commands to navigate around the model in 2D and 3D views.

Detailed Course Outline

Introduction to Revit, Introduction to Revit, Starting a Revit Project, Starting a Revit Project, Working with Views, Working with Views, Revit Families, Revit Families, Basic Sketching and Modify Tools, Basic Sketching and Modify Tools, Adding Columns, Adding Columns, Foundations, Foundations, Structural Framing, Structural Framing, Adding Structural Slabs, Adding Structural Slabs, Structural Reinforcement, Structural Reinforcement, Creating Construction Documents, Creating Construction Documents, Working with Annotations, Working with Annotations, Adding Tags and Schedules, Adding Tags and Schedules, Creating Details, Creating Details

Frequently Asked Questions

Q: What delivery options are available for Autodesk Revit 2025: Fundamentals for Structure?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: How many CPD hours does this course provide?

The 1-day Autodesk Revit 2025: Fundamentals for Structure course provides up to 3.3 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the Autodesk Revit 2025: Fundamentals for Structure training?

The training takes place over 1 day(s), with each day lasting approximately 4.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for Autodesk Revit 2025: Fundamentals for Structure?

Yes, we provide corporate training, dedicated training, and closed classes for Autodesk Revit 2025: Fundamentals for Structure. Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: Autodesk Revit 2025: Fundamentals for Structure, Autodesk, vILT, Autodesk Revit 2025

Q: Why choose Nexus Human for Autodesk Revit 2025: Fundamentals for Structure?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your Autodesk Revit 2025: Fundamentals for Structure training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
