Category: Networking & Security | **Vendor:** IBM

Duration: 36.00 hours (5 days) **29.3 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Be a more effective security administrator using the RACF component of the z/OS Security Server to define users, set up group structures, define general resources, protect z/OS data sets, & use several RACF utilities.

About This Course

Be a more effective security administrator using the RACF component of the z/OS Security Server to define users, set up group structures, define general resources, protect z/OS data sets, & use several RACF utilities.

Who Should Attend

This intermediate course is for people who are new to the RACF component of the z/OS Security Server, and responsible for security administration. This includes people who are planning to implement RACF for the first time, and people who are security administrators in installations where RACF is already implemented. Those inexperienced z/OS users may find the course Basics of z/OS RACF Administration (ES19) more appropriate

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Identify the security requirements of a system

Evaluate the facilities and options of RACF

Define users to RACF

Set up a RACF group structure

Use RACF to protect resources

Select options to tailor RACF

Evaluate and implement RACF database and performance options

Identify tools available for auditing

Administer the system so that it is consistent with the installation's security goals
