Building Streaming Data Analytics Solutions on AWS

Category: AI, Data & Analytics | **Vendor:** Amazon Web Services

Duration: 8.00 hours (1 days) **6.5 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

In this course, you will learn to build streaming data analytics solutions using AWS services, including Amazon Kinesis and Amazon Managed Streaming for Apache Kafka (Amazon MSK). Amazon Kinesis is a massively scalable and durable real-time data streaming service. Amazon MSK offers a secure, fully managed, and highly available Apache Kafka service. You will learn how Amazon Kinesis and Amazon MSK integrate with AWS services such as AWS Glue and AWS Lambda. The course addresses the streaming data ingestion, stream storage, and stream processing components of the data analytics pipeline. You will also learn to apply security, performance, and cost management best practices to the operation of Kinesis and Amazon MSK.

About This Course

In this course, you will learn to build streaming data analytics solutions using AWS services, including Amazon Kinesis and Amazon Managed Streaming for Apache Kafka (Amazon MSK). Amazon Kinesis is a massively scalable and durable real-time data streaming service. Amazon MSK offers a secure, fully managed, and highly available Apache Kafka service. You will learn how Amazon Kinesis and Amazon MSK integrate with AWS services such as AWS Glue and AWS Lambda. The course addresses the streaming data ingestion, stream storage, and stream processing components of the data analytics pipeline. You will also learn to apply security, performance, and cost management best practices to the operation of Kinesis and Amazon MSK.

Who Should Attend

This course is intended for:

- Data engineers and architects
- Developers who want to build and manage real-time applications and streaming data analytics solutions

Prerequisites & Entry Requirements

General Prerequisites:

We recommend that attendees of this course have:

- At least one year of data analytics experience or direct experience building real-time applications or streaming analytics solutions. We suggest the Streaming Data Solutions on AWS whitepaper for those that need a refresher on streaming concepts.
- Completed either Architecting on AWS (AWSA) or Data Analytics Fundamentals
- Completed Building Data Lakes on AWS (BDLA)

Learning Outcomes

Upon successful completion of this course, participants will be able to:

In this course, you will learn to:

- Understand the features and benefits of a modern data architecture. Learn how AWS streaming services fit into a modern data architecture.
- Design and implement a streaming data analytics solution
- Identify and apply appropriate techniques, such as compression, sharding, and partitioning, to optimize data storage
- Select and deploy appropriate options to ingest, transform, and store real-time and near real-time data
- Choose the appropriate streams, clusters, topics, scaling approach, and network topology for a particular business use case
- Understand how data storage and processing affect the analysis and visualization mechanisms needed to gain actionable business insights
- Secure streaming data at rest and in transit
- Monitor analytics workloads to identify and remediate problems
- Apply cost management best practices

Detailed Course Outline

Module A: Overview of Data Analytics and the Data Pipeline

- Data analytics use cases
- Using the data pipeline for analytics

Module 1: Using Streaming Services in the Data Analytics Pipeline

- The importance of streaming data analytics

- The streaming data analytics pipeline

- Streaming concepts

Module 2: Introduction to AWS Streaming Services

- Streaming data services in AWS

- Amazon Kinesis in analytics solutions

- Demonstration: Explore Amazon Kinesis Data Streams

- Practice Lab: Setting up a streaming delivery pipeline with Amazon Kinesis

- Using Amazon Kinesis Data Analytics

- Introduction to Amazon MSK

- Overview of Spark Streaming

Module 3: Using Amazon Kinesis for Real-time Data Analytics

- Exploring Amazon Kinesis using a clickstream workload

- Creating Kinesis data and delivery streams

- Demonstration: Understanding producers and consumers

- Building stream producers

- Building stream consumers

- Building and deploying Flink applications in Kinesis Data Analytics

- Demonstration: Explore Zeppelin notebooks for Kinesis Data Analytics

- Practice Lab: Streaming analytics with Amazon Kinesis Data Analytics and Apache Flink

Module 4: Securing, Monitoring, and Optimizing Amazon Kinesis

- Optimize Amazon Kinesis to gain actionable business insights

- Security and monitoring best practices

Module 5: Using Amazon MSK in Streaming Data Analytics Solutions

- Use cases for Amazon MSK

- Creating MSK clusters

- Demonstration: Provisioning an MSK Cluster

- Ingesting data into Amazon MSK

- Practice Lab: Introduction to access control with Amazon MSK

- Transforming and processing in Amazon MSK

Module 6: Securing, and Optimizing Amazon MSK

- Optimizing Amazon MSK

- Demonstration: Scaling up Amazon MSK storage

- Practice Lab: Amazon MSK streaming pipeline and application deployment

- Security and monitoring

- Demonstration: Monitoring an MSK cluster

Module 7: Designing Streaming Data Analytics Solutions

- Use case review

- Class Exercise: Designing a streaming data analytics workflow

Module B: Developing Modern Data Architectures on AWS

- Modern data architectures, Module 4: Securing, and Optimizing Amazon Kinesis, Module 5: Using Amazon MSK in Streaming Data Analytics Solutions, Module 3: Using Amazon Kinesis for Real-time Data Analytics, Module 2: Introduction to AWS Streaming Services, Module A: Overview of Data Analytics and the Data Pipeline, Module 1: Using Streaming Services in the Data Analytics Pipeline, Module 7: Designing Streaming Data Analytics Solutions, Module 6: Securing, and Optimizing Amazon MSK, Module B: Developing Modern Data Architectures on AWS

Skills You Will Learn:

In this course, you will learn to:

- Understand the features and benefits of a modern data architecture. Learn how AWS streaming services fit into a modern data architecture.
- Design and implement a streaming data analytics solution
- Identify and apply appropriate techniques, such as compression, sharding, and partitioning, to optimize data storage
- Select and deploy appropriate options to ingest, transform, and store real-time and near real-time data
- Choose the appropriate streams, clusters, topics, scaling approach, and network topology for a particular business use case
- Understand how data storage and processing affect the analysis and visualization mechanisms needed to gain actionable business insights
- Secure streaming data at rest and in transit
- Monitor analytics workloads to identify and remediate problems
- Apply cost management best practices

Frequently Asked Questions

Q: What delivery options are available for Building Streaming Data Analytics Solutions on AWS?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: How many CPD hours does this course provide?

The 1-day Building Streaming Data Analytics Solutions on AWS course provides up to 6.5 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the Building Streaming Data Analytics Solutions on AWS training?

The training takes place over 1 day(s), with each day lasting approximately 8.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for Building Streaming Data Analytics Solutions on AWS?

Yes, we provide corporate training, dedicated training, and closed classes for Building Streaming Data Analytics Solutions on AWS. Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: Building Streaming Data Analytics Solutions on AWS, Data Analysis, BSDASA, Amazon Web Services, vILT

Q: Why choose Nexus Human for Building Streaming Data Analytics Solutions on AWS?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your Building Streaming Data Analytics Solutions on AWS training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
