Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR)

Category: Networking & Security | **Vendor:** Cisco

Duration: 40.00 hours (5 days) **32.5 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format:	Instructor Led - Online
Certification:	Cisco Certified Specialist – Service Provider Core, CCNP, CCIE
Related Exam:	350-501

Course Overview

The Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) training expands your knowledge and skills of service provider core networks. You will gain the theoretical and practical knowledge needed to implement and operate service provider networks using technologies such as core architecture, services, networking, automation, quality of service (QoS), security, and network assurance.

This training prepares you for the 350-501 SPCOR v1.0 exam. If passed, you earn the Cisco Certified Specialist – Service Provider Core certification and satisfy the core exam requirement for the Cisco Certified Network Professional (CCNP) Service Provider and Cisco Certified Internetwork Expert (CCIE) Service Provider certifications. This training also earns you 64 Continuing Education (CE) credits towards recertification.

How You'll Benefit

This training will help you:

- Configure, verify, troubleshoot, and optimize next-generation, service provider internet protocol (IP) network infrastructures
- Deepen your understanding of service provider technologies, including core architecture, services, networking, automation, quality of services, security, and network assurance
- Prepare for the 350-501 SPCOR v1.0 exam
- Earn 64 CE credits towards recertification

What to Expect in the Exam

Implementing and Operating Cisco Service Provider Network Core Technologies (350-501 SPCOR) v1.0 is a 120-minute exam associated with the Cisco Certified Specialist – Service Provider Core certification and satisfies the core exam requirement for the CCNP Service Provider and CCIE Service Provider certifications.

This exam tests your knowledge of core service provider network technologies, including:

- Core architecture
- Services
- Networking
- Automation
- Quality of services
- Security
- Network assurance

About This Course

The Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) training expands your knowledge and skills of service provider core networks. You will gain the theoretical and practical knowledge needed to implement and operate service provider networks using technologies such as core architecture, services, networking, automation, quality of service (QoS), security, and network assurance.

This training prepares you for the 350-501 SPCOR v1.0 exam. If passed, you earn the Cisco Certified Specialist – Service Provider Core certification and satisfy the core exam requirement for the Cisco Certified Network Professional (CCNP) Service Provider and Cisco Certified Internetwork Expert (CCIE) Service Provider certifications. This training also earns you 64 Continuing Education (CE) credits towards recertification.

How You'll Benefit

This training will help you:

- Configure, verify, troubleshoot, and optimize next-generation, service provider internet protocol (IP) network infrastructures
- Deepen your understanding of service provider technologies, including core architecture, services, networking, automation, quality of services, security, and network assurance
- Prepare for the 350-501 SPCOR v1.0 exam
- Earn 64 CE credits towards recertification

What to Expect in the Exam

Implementing and Operating Cisco Service Provider Network Core Technologies (350-501 SPCOR) v1.0 is a 120-minute exam associated with the Cisco Certified Specialist – Service Provider Core certification and satisfies the core exam requirement for the CCNP Service Provider and CCIE Service Provider certifications.

This exam tests your knowledge of core service provider network technologies, including:

- Core architecture
- Services
- Networking
- Automation
- Quality of services
- Security
- Network assurance

Who Should Attend

- Network Administrators
- Network Engineers
- Network Managers
- System Engineers
- Project Managers
- Network Designers

Prerequisites & Entry Requirements

General Prerequisites:

There are no prerequisites for this training. However, the knowledge and skills you are recommended to have before attending this training are:

- Intermediate knowledge of Cisco IOS or IOS XE
- Familiarity with Cisco IOS or IOS XE and Cisco IOS XR software configuration
- Knowledge of IPv4 and IPv6 transmission control protocol (TCP)/IP networking
- Intermediate knowledge of IP routing protocols
- Understanding of MPLS technologies
- Familiarity with VPN technologies

These skills can be found in the following Cisco Learning Offerings:

- Implementing and Administering Cisco Solutions (CCNA)
- Understanding Cisco Service Provider Network Foundations (SPFNDU)

Learning Outcomes

Upon successful completion of this course, participants will be able to:

- Describe the service provider network architectures, concepts, and transport technologies
- Describe the Cisco IOS software architectures, main internetwork operating system (IOS) types, and their differences
- Implement open shortest path first (OSPF) in the service provider network
- Implement integrated intermediate system to intermediate system (IS-IS) in the service provider network
- Implement border gateway protocol (BGP) routing in service provider environments
- Implement route maps and routing policy language
- Describe IPv6 transition mechanisms used in the service provider networks
- Implement high availability mechanisms in Cisco IOS XR software
- Implement traffic engineering in modern service provider networks for optimal resource utilization
- Describe segment routing and segment routing traffic engineering concepts
- Describe the virtual private network (VPN) technologies used in the service provider environment
- Configure and verify multi-protocol label switching (MPLS) L2VPN in service provider environments
- Configure and verify MPLS L3VPN in service provider environments
- Implement IP multicast services
- Describe the QoS architecture and QoS benefits for service provider networks
- Implement QoS in service provider environment
- Implement control plane security in Cisco devices
- Implement management plane security in Cisco devices
- Implement data plane security in Cisco devices
- Describe the YANG data modeling language
- Implement automation and assurance tools and protocols
- Describe the role of Cisco Network Services Orchestrator (NSO) in service provider environments
- Implement virtualization technologies in service provider environment

Detailed Course Outline

- Describing Service Provider Network Architectures
- Describing Cisco IOS Software Architectures

- Implementing OSPF for Cisco IOS XR
- Implementing IS-IS for Cisco IOS XR
- Implementing BGP in Service Provider Network
- Implementing Route Maps and RPL
- Transitioning to IPv6 for Cisco IOS XR and IOS XE
- Implementing High Availability in Networking
- Implementing MPLS for Cisco IOS XR
- Implementing Cisco MPLS Traffic Engineering
- Describing Segment Routing
- Describing VPN Services
- Configuring L2VPN Services
- Configuring L3VPN Services
- Implementing Multicast for Cisco IOS XR
- Describing QoS Architecture
- Implementing QoS for Cisco IOS XR
- Implementing Control Plane Security
- Implementing Management Plane Security
- Implementing Data Plane Security
- Introducing Network Programmability
- Implementing Automation and Assurance
- Introducing Cisco NSO
- Implementing Virtualization in Service Provider Environment

□□ Certification Path

Cisco Certified Specialist – Service Provider Core, CCNP, CCIE

Exam: 350-501

Skills You Will Learn:

- Describe the service provider network architectures, concepts, and transport technologies
- Describe the Cisco IOS software architectures, main internetwork operating system (IOS) types, and their differences
- Implement open shortest path first (OSPF) in the service provider network
- Implement integrated intermediate system to intermediate system (IS-IS) in the service provider network
- Implement border gateway protocol (BGP) routing in service provider environments
- Implement route maps and routing policy language
- Describe IPv6 transition mechanisms used in the service provider networks
- Implement high availability mechanisms in Cisco IOS XR software
- Implement traffic engineering in modern service provider networks for optimal resource utilization
- Describe segment routing and segment routing traffic engineering concepts
- Describe the virtual private network (VPN) technologies used in the service provider environment
- Configure and verify multi-protocol label switching (MPLS) L2VPN in service provider environments
- Configure and verify MPLS L3VPN in service provider environments
- Implement IP multicast services
- Describe the QoS architecture and QoS benefits for service provider networks
- Implement QoS in service provider environment
- Implement control plane security in Cisco devices
- Implement management plane security in Cisco devices
- Implement data plane security in Cisco devices
- Describe the YANG data modeling language
- Implement automation and assurance tools and protocols
- Describe the role of Cisco Network Services Orchestrator (NSO) in service provider environments
- Implement virtualization technologies in service provider environment

Frequently Asked Questions

Q: What delivery options are available for Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR)?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: What certification does this course prepare me for?

The Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) course helps prepare you for the Cisco Certified Specialist – Service Provider Core, CCNP, CCIE certification path.

Q: Which exam does this course prepare me for?

This course prepares you for the 350-501 official exam. You can take this exam at any exam center across United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online wherever you are located.

Q: How many CPD hours does this course provide?

The 5-day Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) course provides up to 32.5 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) training?

The training takes place over 5 day(s), with each day lasting approximately 40.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR)?

Yes, we provide corporate training, dedicated training, and closed classes for Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR). Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: Implementing and Operating Cisco Service Provider Network Core Technologies, Cisco Professional Level Service Provider - CCNP, SPCOR

Q: Why choose Nexus Human for Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR)?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
