Who Should Attend

This introductory-level course is ideal for project managers, team leaders, and collaboration-focused roles who are already familiar with Jira and are looking to integrate Confluence into their project workflows.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Throughout the course you will learn to:
Master the fundamentals of Confluence, including understanding its history, navigation, and the distinction between pages and blogs.
Gain proficiency in creating, editing, copying, moving, and deleting pages, along with managing file directories and executing advanced editing features.
Develop the ability to use and create blueprints and templates, aiding in the standardization and productivity enhancement of your team's work.
Understand the collaborative features of Confluence such as sharing links, commenting, mentioning, liking, and watching content to promote a culture of teamwork and collaboration in your organization.
Learn how to effectively integrate Confluence with Jira, linking issues and filters, and using auto-links for smoother project management.
OPTIONAL: Acquire skills in Confluence administration, including managing notifications and watchers, linking to other applications, customizing the look and feel of your workspace, and creating various types of spaces (public, private, team, etc.)
