Certification:	ISTQB® Certified Tester Foundation Level (CTFL)
Related Exam:	CTFL

Course Overview

In this three-day basic training, tasks, methods and techniques of software testing are taught in accordance with the internationally standardized curriculum. You will get a comprehensive overview of all activities related to the testing of software, from the test process through the planning, design and implementation of the test to test execution and test management.

Fundamental aspects of tool support are considered. After the training you will be able to select and apply important test case design procedures and know all the steps of software testing from the module to the acceptance test as well as the relationships with the overall project.
