Course Overview

Tracking issues is a critical component of any project management strategy. JIRA provides a web based single repository for creating, tracking and reporting on feature requests, bugs reported, or managing workflow. Geared for administrators new to Jira, JumpStart to Jira for Administrators | Jira Administration is a two-day, hands-on course that explores the most important tasks required to set up Jira, providing students with ample hands-on experience using common administration tasks. This hands-on course enables the Student to administer a JIRA instance and learn by doing . The focus of this course is on Best Practices, and practical skills.

About This Course

Tracking issues is a critical component of any project management strategy. JIRA provides a web based single repository for creating, tracking and reporting on feature requests, bugs reported, or managing workflow.

Geared for administrators new to Jira, JumpStart to Jira for Administrators | Jira Administration is a two-day, hands-on course that explores the most important tasks required to set up Jira, providing students with ample hands-on experience using common administration tasks. This hands-on course enables the Student to administer a JIRA instance and learn by doing . The focus of this course is on Best Practices, and practical skills.

Who Should Attend

This is an introductory-level course for Administrators who are new to Jira (this is NOT for experienced Jira admin or users). Students should have a background in basic administration.

Prerequisites & Entry Requirements

General Prerequisites:

Before attending the course, it's helpful if you have:

-Basic knowledge of system administration: You don't need to be a master, but some familiarity with concepts related to system administration would be beneficial.

-Understanding of project management principles: Knowledge of how projects are structured and what stages they go through will be advantageous when learning about JIRA's project management capabilities.

-Experience with team collaboration tools: If you've used other collaboration or project management tools, you'll find it easier to understand JIRA's functionality and interface.

-Basic troubleshooting skills: Knowing how to investigate and solve simple technical problems will help you get the most out of the hands-on labs.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

This course is approximately 50% hands-on, combining expert lecture, real-world demonstrations and group discussions with machine-based practical labs and exercises. Working in a hands-on learning environment, exploring several practical use cases that provide context as to where and when to use Jira, students will learn about:

user management

global and project permissions

project roles

schemes

configuration of issue types, workflows, and screens

Detailed Course Outline

- JIRA conceptual review
- Core concepts
- Terminology
- Infrastructure
- JIRA roles

Groups vs Roles

- Overview
- Project roles
- Creating a role
- Project scaling
- JIRA User management

Project Resolution

- Project status
- Resolved status
- Resolution date

Schemes

- Overview
- Project scope schemes
- Adding users to schemes
- Issue type schemes
- Notification schemes
- Permission schemes
- Issue security schemes
- working with schemes

JIRA as a Platform

- Overview
- What can be configured
- Basic JIRA project setup
- Advanced project setup

Workflows

- Overview
- Designing a workflow
- Defining a workflow
- Implementing a workflow
- Deploying workflows
- Workflow events
- Transitions and sub-tasks

Custom Fields

- Overview
- Field types
- Field context
- Limiting contexts
- Adding contexts
- Screens and field configuration
- Best practices for custom fields

User Lifecycle

- Overview
- Adding users
- Adding third-party users
- Modifying users
- Deactivating users

Remote JIRA Access

- Overview
- Emails
- SQL
- REST
- Webhooks
- XML and RSS
- Command Line Interface
- Integrating JIRA with other applications

Migrating Data into JIRA

- Overview
- Migration steps
- The CSV importer
- JIRA cloud migration

Summary and Best Practices

- Looking back at the Big Picture
- Optional - Jira Certification Prep Review
