Course Information

Delivery Format: Instructor Led - Online

Course Overview

In this training you will learn several important basic technologies of .NET 5. Modern CPUs have more and more processors, therefore developers have to master multithreading. APIs of libraries and services are increasingly asynchronous, async and await want to be applied correctly. Background processes run in worker services, for communication between processes we use new gRPC.

About This Course

- Architecture of .NET
- Functional Language Elements of C# (C# 7 to 9)
- Configuration of .NET applications
- Reflection and dynamic programming
- Multithreading und Parallel Framework
- Asynchronous programming (async and await)
- Security und Kryptographie
- Network programming
- Worker Services
- LINQ to XML
- Inter-process communication with gRPC (Google Remote Procedure Call)
- Unit Testing
- Regular Expressions

Who Should Attend

Software developers who want to develop projects on the .NET platform professionally and efficiently.
