Course Overview

Gain expertise in Cognitive Project Management in AI (CPMAI™) certification through PMI's structured program. This training equips professionals to lead AI, machine learning, and cognitive projects using a data-centric, iterative framework across six core phases—from business alignment to responsible deployment. Ideal for project managers, data professionals, and leaders navigating AI initiatives without prerequisites.

About This Course

Gain expertise in Cognitive Project Management in AI (CPMAI™) certification through PMI's structured program. This training equips professionals to lead AI, machine learning, and cognitive projects using a data-centric, iterative framework across six core phases—from business alignment to responsible deployment. Ideal for project managers, data professionals, and leaders navigating AI initiatives without prerequisites.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Turn bold AI visions into clear, achievable project plans

Navigate fast-changing technologies without needing tool-specific training

Unite cross-functional teams around a shared process

Deliver outcomes that are ethical, measurable, and built to withstand business scrutiny

Detailed Course Outline

The Need for AI Project Management

Discover why AI projects struggle, how iterative delivery supports success, and how CPMAI ensures ethical, effective outcomes.

Matching AI with Business Needs (Phase I)

Align AI solutions and strategy to real business needs, assess feasibility, define ROI, and set clear project scope.

Identifying Data Needs for AI Projects (Phase II)

Select the right data, ensure compliance, and build the infrastructure to support AI, laying the groundwork for effective AI data management across the project lifecycle.

Managing Data Preparation Needs for AI Projects (Phase III)

Transform raw data into AI-ready inputs through quality checks, augmentation, and compliance controls.

Iterating Development and Delivery of AI Projects (Phase IV)

Build and validate models, from machine learning to generative AI.

Testing & Evaluating AI Systems (Phase V)

Test and monitor AI models, address drift, and ensure results are reliable, explainable, and aligned with goals.

Operationalizing AI (Phase VI)

Operationalize AI responsibly, manage governance, and plan for continuous improvement.
