Identity management specialist or engineer

Access management specialist or engineer

Web application developer

DevOps specialist

Learning Outcomes

Upon successful completion of this course, participants will be able to:

As a result of attending this course, you will gain an understanding of the architecture of an identity management realm and trusted relationships using both Red Hat Enterprise Linux Identity Management and Microsoft Active Directory. You will be able to create, manage, and troubleshoot user management structures, security policies, local and remote secure access methods, and implementation technologies such as Kerberos, PKI, and certificates.
You should be able to demonstrate these skills:
Create and manage a scalable, resilient Identity Management realm, including both Linux and Microsoft Windows clients and servers.
Create and manage secure access configurations, including managing and troubleshooting Kerberos, certificate servers, and access control policies.
Integrate IdM as the back end for other major enterprise tools in the Red Hat portfolio, including Satellite Server and Tower.

Detailed Course Outline

Install Red Hat Identity Management

- Describe and install Red Hat Identity Management (IdM).

Centralize Identity Management

- Explain the IdM server services, explore IdM clients access methods, and install an IdM client.

Authenticate identities with Kerberos

- Define the Kerberos protocol and configure services for Kerberos authentication.

Integrate IdM with Active Directory

- Create a trust relationship with Active Directory.

Control user access

- Configure users for authorized access to services and resources.

Manage a public key infrastructure

- Manage certificate authorities, certificates, and storing secrets.

Maintain IdM operations

- Troubleshoot and recover Identity Management.

Integrate Red Hat products with IdM

- Configure major services to share the IdM authentication database.

Install scalable IdM

- Construct a resilient and scalable Identity Management topology.

□□ Certification Path

Red Hat Certified Specialist in Identity Management

Exam: EX362
