Who Should Attend

This course is intended for System administrators who are either new to JBoss or have experience with JBoss Enterprise Application Platform 5.

Prerequisites & Entry Requirements

General Prerequisites:

- Base experience with system administration on Microsoft Windows, UNIX, or Linux® operating systems
- Basic understanding of TCP/IP networking
- No prior knowledge of Java or shell scripting is required

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Installing and run JBoss EAP 7 in standalone mode and domain mode Configuring and managing a JBoss EAP domain Deploying applications to JBoss EAP 7 in standalone and domain mode Configuring the datasource subsystem Configuring Java™ Message Service (JMS) Configuring the logging subsystem Configuring the web subsystem Implementing application security in JBoss EAP 7 JVM configuration and tuning for JBoss EAP Clustering JBoss EAP instances

Detailed Course Outline

1 - Red Hat JBoss Enterprise Application Platform: Architecture and Features

- Describe the architecture and features of the Red Hat JBoss Enterprise Application Platform

2 - Configuring JBoss EAP as a Standalone Server

- Configure a standalone server instance of JBoss EAP

3 - Scripting Configuration and Deploying Applications

- Configure JBoss EAP using the Command Line Interface tool and deploy Jakarta EE applications

4 - Configuring JBoss EAP as a Managed Domain

- Configure JBoss EAP as a Managed Domain

5 - Configuring Servers in a Managed Domain

- Configure servers and server groups in a managed domain

6 - Configuring Data Sources

- Configure JDBC database drivers and data sources

7 - Configuring the Logging Subsystem

- Configure log handlers and loggers

8 - Configuring the Messaging Subsystem

- Interpret the messaging architecture and configure various messaging resources

9 - Securing JBoss EAP

- Apply security configurations to enhance the security of applications deployed on JBoss EAP

10 - Configuring the Java Virtual Machine

- Configure the JVM settings in a standalone server and in a managed domain

11 - Configuring the Web Subsystem

- Configure connectors, servers, and other features of the web subsystem

12 - Deploying Clustered Applications

- Configure various subsystems to support the deployment of clustered applications

Frequently Asked Questions

Q: What delivery options are available for Red Hat JBoss Application Administration I - Red Hat Learning Subscription Course (AD248LS)?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: Which exam does this course prepare me for?

This course prepares you for the Red Hat Certified Specialist in Enterprise Application Server Administration; AD248 official exam. You can take this exam at any exam center across United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online wherever you are located.

Q: How many CPD hours does this course provide?

The 5-day Red Hat JBoss Application Administration I - Red Hat Learning Subscription Course (AD248LS) course provides up to 32.5 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the Red Hat JBoss Application Administration I - Red Hat Learning Subscription Course (AD248LS) training?

The training takes place over 5 day(s), with each day lasting approximately 40.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for Red Hat JBoss Application Administration I - Red Hat Learning Subscription Course (AD248LS)?
