Course Overview

This course will empower you to build robust clusters that provide high availability and the ability to run large numbers of applications. You will learn about OpenShift integration with datacenter infrastructure such as load balancers, identity management, monitoring, proxies, and storage. You will also develop more troubleshooting and Day 2 operations skills in this course. You will design an OpenShift HA cluster, then build and test it, using this cluster to examine more advanced topics in the administration and operation of a robust OpenShift cluster through the remainder of the course. This course is based on Red Hat® OpenShift Container Platform 3.6.
