Category: Project Management & Business Skills | **Vendor:** Scaled Agile

Duration: 16.00 hours (2 days) **13.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format:	Instructor Led - Online
Certification:	SAFe® for Hardware Practitioners
Related Exam:	SAFe-HW

Course Overview

The SAFe for Hardware Certification Course is a comprehensive two-day course designed to expedite the seamless integration of SAFe principles into hardware development, accelerate delivery, and maintain flexibility while navigating the complexities of large system designs.

The course is integral for any hardware-focused organization aiming to bridge traditional engineering with modern Agile practices for more efficient, adaptive development.

About This Course

The SAFe for Hardware Certification Course is a comprehensive two-day course designed to expedite the seamless integration of SAFe principles into hardware development, accelerate delivery, and maintain flexibility while navigating the complexities of large system designs.

The course is integral for any hardware-focused organization aiming to bridge traditional engineering with modern Agile practices for more efficient, adaptive development.

Who Should Attend

- System Engineers
- Engineering Practitioners and Developers
- Project and Product Managers
- Team Leads and Managers
- Quality and Compliance Professionals

Learning Outcomes

Upon successful completion of this course, participants will be able to:

What You Will Learn:

- How to design for change, think in smaller batches, and establish faster feedback loops.
- Approaches for gathering and responding to rapid technical, market, and user feedback to iterate and refine products and processes in real-time.
- Best practices for strengthening teamwork and integration between engineers and stakeholders for more effective workflows.
- Proactive risk management, detecting and mitigating safety issues earlier, and integrating compliance into development without impacting velocity.
- Tips for aligning suppliers with Agile workflows and mindsets to ensure more effective coordination and delivery.
- Improve cross-functional collaboration planning, forecasting, delivery, and measurement.
