Course Overview

Trend Micro™ TippingPoint® Security Solutions 1.0 Training for Certified Professionals is a three-day, instructor-led training course that teaches the concepts and best practices necessary for installation, configuration, security management, and system administration of Trend Micro TippingPoint solutions. Through interactive lectures and hands-on activities, students will learn to implement the inspection device and the Security Management System (SMS). Taught by Trend Micro certified trainers, this course incorporates a variety of hands-on lab exercises, allowing participants to put the lesson content into action.

About This Course

Introduction to Trend Micro and TippingPoint

- Trend Micro Overview
- TippingPoint Solutions Overview
- Trend Micro Threat Research

Portfolio Overview

- TippingPoint inspection device platforms
- SMS features and functionalities
- Common deployment scenarios

Inspection Device Setup

- Introduction to License Manager
- Device setup Out-of-Box-Experience
- Local Security Manager (LSM) Introduction

Security Management System

- Setup and Basic Configuration
- Communication Settings
- Threat Insight Portal
- SMS Management

Inspection Device Management

- Device configuration
- Network configuration and High Availability
- TippingPoint Operating System (TOS)

Security Profile Management

- Digital Vaccine (DV)

- Profile Versioning, Rollback, and Auditing
- Profile Search
- Managing Multiple Profiles

Traffic Management and Bypass Rules

- Flow based vs. non-flow based DV filters
- Traffic Management Filters
- Inspection Bypass Rules

Quarantine

- Blocking vs. Thresholds
- Quarantine Considerations

SMS Events and Reports

- SMS Event Management
- SMS Reports
-

SMS Dashboard

- SMS Dashboard Customization
- Geo Locator Database

Maintenance and Performance

- Analyze System Health Details
- Inspection Tier Stats
-

Best Practices

- System Architecture

- Deployment Considerations
- System Administration

Troubleshooting

- Analyze System Health Details
- Inspection Tier Stats

Cloud Network Protection

- What is Cloud Network Protection
- Deployment Models

Who Should Attend

This course is designed for security and IT professionals who are responsible for protecting networks from any kind of network, endpoint, or cloud security threats. The individuals who will typically benefit the most include:
