VMware Site Recovery Manager: Install, Configure, Manage [8.6]

Category: Infrastructure & IT Operations | **Vendor:** VMware

Duration: 16.00 hours (2 days) **13.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

This two-day, hands-on training course gives experienced VMware vSphere® administrators the knowledge to install, configure, and manage VMware Site Recovery Manager™ 8.6. This course also shows you how to write and test disaster recovery plans that use Site Recovery Manager.

About This Course

This two-day, hands-on training course gives experienced VMware vSphere® administrators the knowledge to install, configure, and manage VMware Site Recovery Manager™ 8.6. This course also shows you how to write and test disaster recovery plans that use Site Recovery Manager.

Who Should Attend

vSphere administrators, architects, system engineers, and systems integrators who are responsible for the deployment or management of Site Recovery Manager

Prerequisites & Entry Requirements

General Prerequisites:

Before taking this course, you should have completed one of the following course(s):

- VMware vSphere: Install, Configure, Manage [V8] (VSICM8)
- VMware vSphere: Fast Track [V8] (VSFT8)
- VMware vSphere: Troubleshooting [V8] (VSTS8)

Or equivalent knowledge and administration experience with VMware ESXi™ and VMware vCenter Server™.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

By the end of the course, you should be able to meet the following objectives:

- Summarize the components of Site Recovery Manager architecture
- Deploy and configure the Site Recovery Manager appliance
- Describe the principal disaster recovery topologies that are used with Site Recovery Manager
- Configure inventory and resource mappings
- Describe the storage replication options that are used with Site Recovery Manager
- Configure Site Recovery Manager to leverage array-based replication
- Describe VMware vSphere® Replication™ functionality
- Describe the vSphere Replication architecture
- Deploy and configure vSphere Replication for use with Site Recovery Manager
- Build Site Recovery Manager array-based protection groups, protection groups based on vSphere Replication, and Virtual Volumes protection groups.
- Build, edit, execute, test, and remove a recovery plan
- Perform a planned migration

Detailed Course Outline

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 Site Recovery Manager Architecture

- Describe Site Recovery Manager architecture
- Identify disaster recovery options with Site Recovery Manager
- Evaluate how Site Recovery Manager integrates with VMware products
- Describe Site Recovery Manager licensing options
- List the disaster recovery topologies supported by Site Recovery Manager
- Describe how VMware Site Recovery for VMware Cloud on AWS integrates with Site Recovery Manager

3 Deploying and Configuring Site Recovery Manager

- Identify the vSphere and vCenter Server requirements for deploying Site Recovery Manager
- Define Site Recovery Manager virtual appliance system requirements
- Deploy the Site Recovery Manager appliance
- Navigate the Site Recovery Manager configuration UI
- Describe the process for registering Site Recovery Manager with vCenter Server
- Describe how to start and stop services in Site Recovery Manager
- Identify ways to perform updates to the Site Recovery Manager appliance
- Describe the options for accessing the Site Recovery Manager
- Describe the process for configuring site pairing
- Describe how to import and export Site Recovery Manager configuration
- Navigate the Site Recovery Manager configuration UI
- Describe the process for registering Site Recovery Manager with vCenter Server
- Describe how to start and stop services in Site Recovery Manager
- Identify ways to perform updates to the Site Recovery Manager appliance
- Describe the options for accessing the Site Recovery Manager
- Describe the process for configuring site pairing
- Describe how to import and export Site Recovery Manager configuration

4 Configuring Inventory Mappings

- Explain the importance of inventory mappings
- Identify configuration options for inventory mappings
- Describe the importance of placeholder virtual machines and datastores
- Describe the importance of the vSphere inventory changes for Site Recovery Manager operation

5 Using Array-Based Replication

- Describe array-based replication
- Describe Storage Replication Adapters and explain their role for the array-based replication
- Describe the concept and configuration of array pairs
- Describe datastore groups and the relationship between devices and datastore groups
- Describe the role of consistency groups
- Identify the advantages of array-based replication

6 vSphere Replication

- Describe Site Recovery Manager with vSphere Replication Architecture
- Discuss the role of vSphere Replication components
- Discuss use cases for vSphere Replication
- Discuss system requirements and operational limits of vSphere Replication
- Determine how to calculate bandwidth requirements for vSphere Replication
- Identify the advantages of vSphere Replication
- Deploy a vSphere Replication appliance
- Configure a vSphere Replication appliance and register it with vCenter Server
- Pair vSphere Replication appliances
- Deploy an additional vSphere Replication server
- Register a vSphere Replication server with a vSphere Replication management server

7 Replicating VMs Using vSphere Replication

- Describe the replication process used by vSphere Replication
- List vSphere Replication replica states
- Describe vSphere Replication of encrypted virtual machines
- Describe vSphere native key provider
- Describe how to configure vSphere Replication
- Discuss vSphere Replication RPO settings
- Describe MPIT instances
- Describe additional vSphere Replication settings
- Describe how to disable vSphere Replication
-

8 Protection Groups

- Define protection group functionality
- Examine the differences between array-based protection groups, protection groups based on vSphere Replication, and Virtual Volumes protection groups
- Create a protection group
- View a placeholder virtual machine in the inventory
- Configure protection for virtual machines and edit protection groups

9 Recovery Plans

- Discuss recovery plan concepts
- Discuss network planning
- Discuss the organization of storage for recovery plans

- Describe customization options in recovery planning
- Describe priority groups and VM dependencies
- Describe how to implement a recovery plan
- Configure VM recovery plan properties
- Describe the customization of recovery plans
- Configure additional steps in the recovery plan
- Delete a recovery plan

10 Executing Recovery Plans

- Discuss use cases for Site Recovery Manager
- Describe planned migration
- Identify Site Recovery Manager workflows
- Examine Site Recovery Manager integration with various vSphere technologies
- Describe how to conduct a recovery plan test
- Perform a recovery plan test
- Identify the effect on the storage layer during the test recovery steps
- Review the recovery plan test steps
- Describe how to cancel a recovery plan test and clean up after recovery plan test cancelation
- Explain a recovery plan execution in planned migration or disaster recovery mode
- Identify the recovery steps for each execution type
- Describe a forced recovery
- Explain the importance of reprotection processes and states
- Examine failback steps
- Describe how to reprotect a data center

11 Monitoring and Troubleshooting

- Identify Site Recovery Manager alarm options

- Generate Site Recovery Manager recovery plan history reports

- Configure Site Recovery Manager advanced settings

- Identify Site Recovery Manager logs

- Describe the vRealize Operations management pack for Site Recovery Manager

Skills You Will Learn:

By the end of the course, you should be able to meet the following objectives:

- Summarize the components of Site Recovery Manager architecture
- Deploy and configure the Site Recovery Manager appliance
- Describe the principal disaster recovery topologies that are used with Site Recovery Manager
- Configure inventory and resource mappings
- Describe the storage replication options that are used with Site Recovery Manager
- Configure Site Recovery Manager to leverage array-based replication
- Describe VMware vSphere® Replication™ functionality
- Describe the vSphere Replication architecture
- Deploy and configure vSphere Replication for use with Site Recovery Manager
- Build Site Recovery Manager array-based protection groups, protection groups based on vSphere Replication, and Virtual Volumes protection groups.
- Build, edit, execute, test, and remove a recovery plan
- Perform a planned migration

Frequently Asked Questions

Q: What delivery options are available for VMware Site Recovery Manager: Install, Configure, Manage [8.6]?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: How many CPD hours does this course provide?

The 2-day VMware Site Recovery Manager: Install, Configure, Manage [8.6] course provides up to 13.0 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the VMware Site Recovery Manager: Install, Configure, Manage [8.6] training?

The training takes place over 2 day(s), with each day lasting approximately 16.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for VMware Site Recovery Manager: Install, Configure, Manage [8.6]?

Yes, we provide corporate training, dedicated training, and closed classes for VMware Site Recovery Manager: Install, Configure, Manage [8.6]. Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: VMware Site Recovery Manager: Install, Configure, Manage [8.6], VMware vSAN & SRM, SRMICM86

Q: Why choose Nexus Human for VMware Site Recovery Manager: Install, Configure, Manage [8.6]?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your VMware Site Recovery Manager: Install, Configure, Manage [8.6] training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
